Reference letter

In April 2019 Eurasian Foods JSC hired Corrocoat Caspian LLP for lining (internal coating) of two sulfuric acid tanks (93% concentration). Plasmet AR3 coating was used for the job.

Plasmet AR3 material was chosen due to its chemical resistance to highly aggressive environments such as sulfuric acid. The material is manufactured locally at Corrocoat Caspian facility in Almaty, Kazakhstan.

At the moment the lined tanks are still in operation after more than 2 years in service.

Corrocoat Caspian LLP has proven to be a reliable and committed partner. The work was done in shortest time with high HSE standards. Corrocoat Caspian employees demonstrated high level of professionalism, support and flexibility when dealing with various challenges during the project.

Our company is fully satisfied with the quality of products and services of Corrocoat Caspian LLP and plans to continue such a long term relationship with this partner.
