Subject: Vessel Intrenal coating – Note of Thanks

Since 2018 Corrocoat Caspian LLP has been performing lining (internal coating) works of various process vessels and tanks at the KPO Turnaround and Shutdown projects. The company coated more than 100 process vessels over the past 5 years with Corrothane XT vinyl-ester-urethane glassflake coating manufactured by Corrocoat Caspian in Almaty, Kazakhstan. Corrothane XT coating was selected and approved by KPO for its good resistance to H₂S and chemical corrosion as well as due to its high thermal and pressure resistance.

Over the past 5 years Corrocoat team demonstrated good organizational, operational, HSE and Quality Control procedures at each stage of corrosion prevention activities. Corrocoat has carried out all the activities using own equipment, materials and resources within the limited TA period.

KPO would like to thank Corrocoat team for the good quality job and recommends the company as a highly professional contractor.
