To whom it may concern

Recommendation letter

PetroKazakhstanOilProducts LLP (Shymkent oil refinery) cooperates with Corrocoat Caspian LLP since December 2020 in terms of performing works on composite repair of oil and fuel tanks, anticorrosion protection of tanks, process vessels and pumping equipment.

The coating systems like Polyglass and Corroglass manufactured by Corrocoat Caspian LLP in Kazakhstan meet all our high quality requirements.

Corrocoat's composite repair technology allows to repair deep pitting corrosion, recover and re-enforce metal with reduced thickness, and provides a very cost effective long-term solution.

Our company is fully satisfied with the quality of Corrocoat Caspian coatings and services and is planning to extend this cooperation in future.
