Schlumberger

Letter of recommendation.

In 2021 Schlumberger Logelco Inc. signed a contract with Corrocoat Caspian LLP for lining (internal coating) of hydrochloric acid tanks (36% concentration). Over the past 2 years (2021 and 2022) Corrocoat Caspian LLP lined 4 (four) acid haulers and 6 (six) acid transportation tanks. Polyglass VE coating and lamination technology was used for this job.

Polyglass VE material was chosen due to its chemical resistance to highly aggressive environments such as hydrochloric acid. The material is manufactured locally at Corrocoat Caspian facility in Almaty, Kazakhstan.

At the moment the lined tanks are in good condition and in service.

Our company is fully satisfied with the quality of products and services of Corrocoat Caspian LLP. The work was done withing the initial schedule. Corrocoat Caspian employees demonstrated high level of HSE standards, professionalism and flexibility throughout the past 2 years.

Schlumberger Logelco Inc. plans to extend such a positive relationship with this partner in future.

Inspector Schlumberger Logelco Inc.
